ANNUAL RAM SALE

10th November 2026 | **1.30pm On Farm**

48 Coopworth and 25 Romworth Two Tooth Rams on offer

2026 RAM SALE

10th November 2026

1.30pm On Farm | Viewing from 11am

377 Hinerangi Road, Hatuma 4281 and online with BIDR

FEGold Leading facial eczema genetics

Coopworths genetic gain guaranteed

WormFEC™

WELCOME TO MARLOW GENETICS ANNUAL RAM SALE

The Wyn-Harris family have been breeding high performance sheep for nearly sixty years.

Tim established the stud in 1968 and ran it for fifteen years. Steve took over in 1983 and ran it for the next forty years and since 2023, Jason and Rosa have been in charge.

During the mid-1960's growing out of frustration with the Romneys of the day, Border Leicester rams were put across the Romney flock. Heartened by the lift in performance and the easier care of the cross bred progeny, when the Coopworth Breed Society was formed in 1968, the Marlow stud was established.

Right from the beginning, the Coopworth Society required objective performance recording with selection and culling based on that measured performance.

Early Marlow objectives were improved reproduction and mothering ability, growth and wool weight. Selection for meat yield was added and a strict policy of culling for faults and conformation followed.

Then in 2000 the breeding program for Facial Eczema Resistance using Ramguard selected rams was begun. Since 2010, no ram has been used that hasn't passed nil with the Ramguard test at .6 or higher.

In recent years a strong focus has been on breeding for FEC or worm resistance but with an eye also on resilience. The genetic trend lines show a dramatic lift in this trait and that has been reflected in a significant reduction on drenching of young stock. No adult sheep are drenched.

Marlow Genetics now has sheep at the top of SIL's NProve rankings with a high degree of resistance to both FE and worms.

Kind Regards
Jason Wyn-Harris

MARLOW
GENETICS

CONDITIONS OF SALE

This sale will be conducted under the Conditions of Sale of the New Zealand Stock and Station Agents. A copy can be provided upon request or found online. All lots are sold exclusive of GST.

Stud Ram Transfer: Coopworth and Romworth rams purchased for registered SIL recorded breeding operations will attract a minimum bid of $6,000.

Health & Safety: Visitors are reminded of the health and safety regulations and requested to follow instructions and take all care and responsibility for all actions while on the property.

Commission: A 6% rebate is offered by PGG Wrightson to all approved non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale.

Insurance: All rams become the buyer's responsibility at the fall of the hammer. We strongly recommend insuring your rams.

Selling order: Rams will enter the ring in threes and will be sold in catalogue order.

Disclaimer: While all care and responsibility has been taken by the vendors and agents, no responsibility can be taken for any errors or omissions in the provided information.

GENETIC INDEXES AND ABBREVIATIONS EXPLAINED

The indexes explained below are economic values, measured in cents. E.g. a ram with a NZMW index of 2500 is equivalent to 2500 cents or $25. His progeny inherits half his genetics or $12.50. If he has 100 progeny, he generates $1250 for the farm business in that year compared with an average ram in 1995 with a zero index.

MW+M New Zealand Maternal Worth + Meat. An industry standard index for dual purpose sheep based on reproduction, lamb survival, lamb growth, meat and adult ewe size indexes.

DPX A rating of an animal's ability to tolerate an FE challenge, based on the RamGuard system. The level of challenge can differ between farms so this index is most accurate for comparisons within farm and birth year. Based on GGT21 BV.

DPG Dual purpose lamb growth. A function of pre-weaning growth, ewe milking ability, post weaning growth and carcase weight.

DPCR Dual purpose capped reproduction. The economic value of more lambs per year, per 2-Tooth and older ewes. Based on number of lambs born (NLB). This is capped so extreme fertility is not rewarded.

DPA Dual purpose adult size. A function of an adult ewe liveweight BV (EWT). Heavier ewes are penalised as have greater feed demand.

DPS Dual purpose lamb survival. A function of lamb vigour at birth and ewe mothering ability.

DPM Dual purpose meat. A function of meat yield measured through EMA scanning.

DPF Dual purpose internal parasite. Measured from faecal egg count (FEC) using Wormfec system.

DPD Dual purpose dag score. The propensity to carry dags – based on LDAG (lamb) and ADAG (adult) BVS.

DPW Dual Purpose Wool. SIL genetic index used by Beef + Lamb New Zealand to estimate a sheep's genetic potential for wool production, based on fleece-weight breeding values.

BR/RR Birth rank/rear rank. Eg. 2/1 means born as a twin, reared as a single.

Lambing String The number of lambs the dam has birthed each year.

SHADING:
Shading indicates ram is placed in top 10, 20 or 30% for that particular trait. Benchmarked across all SIL recorded maternal flocks of 2025 born rams.
