KOANUI

POLLED HEREFORDS

ON-FARM BULL SALE
1pm, Thursday 21 May

At 'The Sale Shed'
839 Maraetotara Rd
Havelock North

www.koanuiherefords.co.nz

KOANUI
POLLED HEREFORDS

Better Beef Breeding Workshop

Tuesday 28 April, 10am – 2:30pm, at the Koanui Sale Shed.

Register for hands-on bull selecting workshop, bull preview & lunch.

KPH | KOANUI POLLED HEREFORDS

Building on 50 years!

On-farm auction with bidr®

65 rising two-year-old Polled Hereford bulls

1 pm, Thursday 21 May 2026

All our sale bulls are:

- TB Status C10
- Fully BVD vaccinated and tested negative
- 'Gold Standard' using Tararua Breeding Centre's Bull Fertility Evaluation - covering Libido, Penile Soundness and Semen
- Free of tested genetic defects using Neogen 100K genomics testing
- Homozygous Polled unless stated in sale notes
- *Backed by our satisfaction guarantee!*

All bulls can be viewed next to 'The Sale Shed' from 10:30am on sale day.

You are invited to enjoy our hospitality. Morning tea, lunch and after sale refreshments will be available. We look forward to seeing you!

We encourage you to view the animals prior to the sale where possible. Pre-sale day inspection is available by arrangement any time. Please contact the Koanui team or your livestock agent for more information.

The Koanui Sale 2026

Dear friends and fellow cattle breeders,

2026 has been a busy year for us at Koanui with a lot of change. The purchase of Pukekura Station near Poukawa in December is an exciting development. Pukekura has tremendous potential as a substantial breeding and finishing unit under Glen Chesterman's management. Hugh has returned home from overseas and is supporting our marketing and development at Pukekura.

Staffing at our Koanui home block has changed a lot too with Allie and Caleb taking a "Sea change" in Whitianga, the employment of Chris Wroe as Manager and Jaedyn Knight as Shepherd. The hope is that these changes will allow us to have more time across the business.

Chris is also honoured to be accepted as a councillor on the NZ Hereford Association. He hopes to connect with fellow breeders over the coming year to help guide the future of New Zealand Herefords.

Koanui staff Christmas party at Pukekura Station. From left: Cory Hollister (Manager at Hayland), Jen Chesterman, Rachel Barclay, Henry James (Manager at Te Kura), Glen Chesterman, Nathan Foot, Allie Chesterman, Caleb White and Chris Chesterman.

We are extremely proud of this year's line of bulls; they have consistency from first to last Lot. They possess the structure, phenotype, and docility that we believe is so important. Rigorous culling over the past few years has improved our breeding herd's consistency in these areas. We are extremely proud of our cow herd and have enjoyed showing the herd to overseas breeders recently. The functionality and productivity that our cow herd provides is the strength behind every Koanui bull in this year's sale.

With expansion of the farmed lands and consolidation of our genetics we are now in a strong position to expand the herd again, back to eight hundred registered cows plus two hundred commercials. A larger herd allows tremendous scope for greater selection pressure, the opportunity to progress diverse Koanui bloodlines

and maximising market opportunities. Our goal remains producing quality cattle with high performance and calving ease that work in any market.

Demand for Koanui genetics in Australia has surged in recent years. Koanui Lips and Koanui Zeus have had strong semen sales and breeding very well in several Australian herds. We are also starting to promote fit-for-purpose Koanui bulls such as Koanui Lips and Koanui Rio as semen sales into the New Zealand dairy industry.

This year we have brought the rising two-year bull sale date forward by three weeks. We made the change to (hopefully) be more convenient by avoid clashing with the National Field days, and also to allow time for the farm to reset before calving. We are confident that the bulls are ready for sale, and we look forward to seeing you on the 21st of May with our usual hospitality.

We hope you can make it in person, but you can also purchase with confidence via bidr. Videos of the sale bulls are available online and you can rest easy knowing we guarantee all purchases.

We stand by our bulls, and our clients, 100%. Our commitment to the breeding programme is a passion that we enjoy. We find it rewarding to see those genetics working for you and your breeding programme. Get in touch if you have bespoke needs, want to visit, or if you need any support with finding the right Koanui bull for your herd.

All the best,

Chris and Jennifer Chesterman

HEREFORD NZ EBV's Explained

BREEDPLAN EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. BREEDPLAN information should always be used in conjunction with other selection criteria, including visual assessment.

A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT NEW ZEALAND HEREFORD SIRE

A BREEDPLAN Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

Which New Zealand Hereford Selection Index should you use?

1. Identify the New Zealand Hereford selection index of most relevance to you.
2. Rank animals using the chosen selection index.
3. Consider the individual EBVs of importance.
4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online at the Hereford NZ website: www.herefords.co.nz or at Pivot Design: www.pivotdesign.co.nz/catalogues

NEW ZEALAND HEREFORD BREEDPLAN

A BREEDPLAN Guide to Interpreting EBVs outlines how to assess and compare the genetic merit of animals. Please note that only EBVs from the same BREEDPLAN analysis can be directly compared. New Zealand Herefords publishes the following BREEDPLAN EBVs:

Calving Ease Direct (%): Higher (or more positive) CEDir EBVs indicate that two year old heifers will have less difficulty when calving this sire's progeny.

Calving Ease Daughters (%): Higher (or more positive) CEDtr EBVs indicate easier calving of this sire's daughters at two years of age.

Gestation Length (days): Bulls with lower (or more negative) GL EBVs are expected to produce progeny with shorter gestation lengths. Such progeny are also expected to be easier calving.

Birth Weight (kg): Bulls with lower, less positive BWt EBVs are expected to produce progeny that are lighter at birth, with an associated lower risk of calving difficulty. This EBV is particularly important when selecting sires where there is an increased risk of calving difficulty (e.g. heifers, cross-breeding).

200, 400 & 600 Day Weight EBVs (kg): Bulls with larger (or more positive) Weight EBVs are expected to produce progeny that grow faster to 200, 400 & 600 days of age, respectively. The Weight EBV of particular importance will depend on the target market e.g. vealer (200 D), yearling (400 D) or heavy steer (600 D).

Mature Cow Weight (kg): Bulls with larger (or more positive) MCW EBVs are expected to produce daughters with higher mature cow weights and increased feed requirements. More moderate MCW EBVs are generally more favourable in self replacing or maternal production systems.

Milk (kg): Bulls with higher (or more positive) Milk EBVs are expected to produce daughters with more maternal ability leading to higher 200 day weights in their progeny. Selection for moderate Milk EBVs may be preferable in harsher environments as cows with higher Milk EBVs can have impaired fertility and decreased survival under such conditions.

Maternal Value (kg): Bulls with larger (or more positive) Maternal Value EBVs are expected to produce daughters whose progeny will grow faster to 200 days of age.

Scrotal Size (cm): Bulls with larger (or more positive) SS EBVs indicate better semen quality and quantity. Daughters are expected to be more fertile and reach puberty at an earlier age.

Days to Calving (days): Bulls with lower (or more negative) DTC EBVs are expected to produce daughters that are more fertile and have a shorter interval from bull-in date to calving.

Carcase Weight (kg): Bulls with larger (or more positive) CWt EBVs are expected to produce progeny with heavier carcase weights.

Eye Muscle Area (sq. cm): Bulls with a higher (or more positive) EMA EBV are expected to produce progeny with better muscling.

Rib and Rump Fat EBVs (mm): Bulls with higher (or more positive) Rib & Rump Fat EBVs are expected to produce fatter progeny, relative to carcase weight. The desire for more or less fat will depend on the finishing ability of your animals.

Retail Beef Yield (%): Bulls with higher (or more positive) RBY EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat (%): Bulls with higher (or more positive) IMF EBVs are expected to produce progeny with more marbling and better grading scores (e.g. MSA).

Dockility (%): Bulls with higher (or more positive) DOC EBVs are expected to produce more progeny with acceptable temperament.

SELECTION INDEXES

New Zealand Herefords currently reports three different selection indexes. These are the: **Hereford Prime Index, Beef Heifer Index, & the Dairy Beef Index**

Each selection index is reported in units of net profitability per cow mated (\$), and relates to a commercial herd using Hereford bulls. Each selection index is focused on efficient beef production, including maternal traits where appropriate. Scan the QR code for more details.

The top priced bull in 2023 at the Koanui Bull Sale, \$42,000 to Maranui. Milton is breeding exceptionally well in both New Zealand and Australia. He has great performance with quality and he is very docile. A trait leader for Scrotal Size EBV, Milton is in the top 1% of the breed for Hereford Prime and top 5% for Beef Heifer \$ Index. Milton's dam is one of Koanui's top cows and a Silver Benchmark dam.

Rainmaker is an outcross sire that has an exciting data set and will be a great asset in our breeding programme. His sons will feature in this year's rising two-year-old bull sale at Koanui. Rainmaker is an NZ Hereford Sire Trait Leader for short Gestation Length EBV and in the top 15% of the breed for 600-day Growth EBV and most impressively he is in the top 4% of the breed for carcase weight EBV. This bull is a money maker

Koanui Transformer S560 0216210560 Top of the breed for low birth weight and high calving ease, Transformer is in the top 10% of the breed for Dairy Beef \$ Index. Transformer is a rock star in our heifer mating programme and yet he still breeds top beef animals. Impeccable feet, phenotype and cosmetic appeal. His dam Koanui Blush P056 was an outstanding breeder who has last year's Koanui keeper bull, Koanui Legacy U236. She was an exceptional cow who was unfortunately lost in Cyclone Gabrielle.

Used as a yearling. Racoon has an excellent body and is easy keeping and very maternal. He is a quality bull just like his dam who is a standout in the herd. She had a top bull in the 2025 sale who sold to Ratanui. The sire, Rainmaker, is an important sire in our programme and Racoon is probably the best! You really need to see this bull to appreciate what he has to offer, his genetic package and phenotype is stacked for consistency. Semen retained for within herd use.

BULL FERTILITY EVALUATION

The bulls listed on the following page have met the following parameters that are required to pass the Tararua Breeding Centre Bull Fertility Evaluation carried out on behalf of

Chris & Jennifer Chesterman

of

Koanui Polled Herefords Ltd

at

Havelock North

Friday, 20 February 2026

Libido

Bulls must demonstrate the ability to mount an "in season" heifer or cow.

Penile Soundness

Each bull's extended penis is examined during mounting for structural soundness, injuries and abnormalities.

Semen Evaluation

Each bulls ejaculate, which is collected by artificial vagina, is examined microscopically for volume, density, motility and morphology and must pass the minimum standards of 75% normal.

Signed:

Lucas Reina
Bovine Reproduction Consultant
Saturday, 28 February 2026

Conditions of Sale

This sale is a “Hybrid online and on farm auction sale.” In addition to the normal on-farm auction format the sale will be hosted by bidr® (www.bidr.co.nz) as a HYBRID auction, with online bidding and a live-stream available on sale day. Note the on-farm auctioneer remains in control of the sale and the fall of the hammer.

The New Zealand Stock & Station Agent’s Association Conditions of Sale and, to the extent deemed relevant by PGG Wrightson Limited (PGW), PGW’s Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW monthly credit account, then PGW’s Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of PGW’s Terms of Sale and Monthly Account Terms of Trade are also available online at: www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions or in hardcopy on request.

PGW will pay a purchasing rebate at a negotiated 6% figure of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a PGW account who have introduced buyers to PGW before the sale and/or accompanied buyers to the sale.

1. All intending ONLINE purchasers must register on bidr® in advance of the sale date, by visiting the website and using the “sign up” button, adding their contact information and nominating the agency they would like to purchase through and account held with that agency. Alternatively, purchasers can organise an agent from one of the agencies listed on bidr® to buy on their behalf.
2. All intending on-farm purchasers must register with the booking clerk in the sale shed prior to the sale.
3. All Lots sold exclusive of GST.
4. PAYMENT: Fourteen days after the sale.
5. Although all care has been taken in compiling this Sale Catalogue, no responsibility will be taken for any errors or omissions thereof.
6. Every Lot will be at the risk of the purchaser as from the fall of the hammer.
7. Buyers are advised to insure Bulls. All Bulls remaining on the property pending delivery must be insured by the Purchaser as no responsibility shall be taken by the Vendor.
8. All bulls are to be uplifted by 12 June, 2026 unless arrangements have been made prior to the sale.
9. ALL STUD BULLS purchased must be uplifted as soon as transport is available. Please provide Transfer Herd Number(s) on the Purchaser’s Slip.
10. All successful purchasers (including ONLINE purchasers) must complete a KOANUI Purchasers Slip. Complete all compulsory fields and return to your agent immediately after the sale. Don’t forget to arrange your insurance, and thank you for your support!

KOANUI POLLED HEREFORDS Ltd.

Purchaser's Instruction Slip

To be completed by the purchaser at the end of the sale for the vendor's records. Please complete this slip and hand to clerk at completion of sale. * indicates compulsory fields
